Art Unit: 1649

1) Claims 20 to 73 are pending in the instant application. Claims 1 to 19 have been canceled and claims 20 to 73 have been added as requested by Applicant in the correspondence filed 19 September of 2003.

2) The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 34 to 87 have been renumbered 20 to 87, respectively. It is suggested that Applicant provide a new listing of the claims reflecting the correct claim numbering, including dependency, and omitting the text ""Support at page 12, lines 17-26" from claim 41.

3) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 20 to 30, drawn to an isolated PF4AR polypeptide, classified in class 530, subclass 350.
- II. Claims 31 to 52, drawn to an isolated nucleic acid encoding a PF4AR polypeptide, and method of use, classified in class 435, subclass 69.1.
- III. Claims 53 and 54, drawn to a method of using a nucleic acid probe or primer, classified in class 435, subclass 6.

Art Unit: 1649

- IV. Claims 55 to 73, drawn to an antibody that binds to a PF4AR polypeptide, classified in class 530, subclass 388.22.

The inventions are distinct, each from the other because of the following reasons:

The polypeptide of invention I, the nucleic acid of invention II, the probe or primer employed in the processes of invention III, and the antibody of invention IV are four different chemical compounds each of which can be made and used without the others. Because these four different compounds lack a common utility that is based upon a common structural feature or combination of features that distinguish them as a group from the prior art, a search of any two or more of these compounds in a single application constitutes an undue burden.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
